

## **StreamWIDE Brings Digital Transformation from Headline to Bottom-Line**

February 28, 2017

Paris – StreamWIDE, a global leader in mobile technology and telecommunications, has announced the launch of a new feature called “My Business” to complement their existing Team on the Run and Team on Mission business process communications platforms.

When added to a Team on the Run package, in the cloud or on premise, My Business provides a comprehensive enterprise communication and process tool for organizations of all sizes, for any mobile or desktop use case. Management can access ready-made templates from a vast library or, with the use of a user- friendly design studio, create and customize templates specific to any industry vertical. Employees can easily initiate and receive processes from their mobile device, tablet, or desktop; such as, task assignments, fillable forms, timesheets, service orders, check in-check out time sheets, bar code scans, NFC and Bluetooth tags and IoTs data input, and physical or digital signatures. My Business integrates with other existing capabilities of the secure Team on the Run software platform including Push-To-Talk, VoIP Calling, Multi-Channels, Geolocation, Group Messaging and Dispatch/Fleet Management.

“We are excited to showcase our product during the upcoming Mobile World Congress; the industry has been talking about digitalization and business process optimization for years”, notes StreamWIDE CEO Pascal Beglin, “My Business delivers latest technological advancements together with superior User Experience to make Digital Transformation promises a reality.”

Nearly half of all enterprises are expected to implement a digital transformation initiative within the next three years; until now, the search was on for investments delivering a measurable ROI. Team on the Run has demonstrated proven use-cases across industry verticals worldwide -- easily implemented at an affordable price. My Business, will reshape how your business is done by eliminating paper processing, painful procedures and delivering outstanding User Experience in a natively mobile environment.

### **About StreamWIDE:**
